or

Modern

or

Classic

Transform a room from ordinary to extraordinary

It's easy with easyascot®

Be Inspired and **D.I.Y.**

EASYCRAFT®
Innovative Wall Linings

How do I do it?

easyascot® can be installed instead of run-of-the-mill linings such as fibre cement or plasterboard. If your walls are already lined then easyascot® goes straight over the top……**it's easy**

What will I need?

☐ Tape Measure
☐ Pencil (not a pen)
☐ Spirit Level
☐ String Line
☐ Construction Adhesive

☐ Saw (Circular or Hand)
☐ Hammer
☐ Nails
☐ Dust Mask
☐ Safety Goggles

_____ **x easyascot® panels** (Measure the length of wall/s you are covering and divide by 600mm. Always round up e.g. 8.4 will become 9 panels).

_____ **x easydado® rails** (3.6m each)

Let's Start!

1. Remove existing skirting boards.
2. Start in the middle of each wall and draw a plumb (vertical) line.
A. For an even number of panels, place the first panel adjacent to the line.
B. For an odd number of panels, place the first panel squarely over the line.
3. Allow a 10mm gap from the floor. (use a spacer to make this easy)
4. Apply construction adhesive to the wall, plumb with a spirit level and nail the panel into the studs.
5. Butt up the next panel and repeat.
6. Continue until a full panel won't fit. At this point, reverse a panel, cut to size and place in gap.
7. Place easydado® rail along the top edge.
8. Replace skirting boards and paint to suit.
9. Sit back and accept the praise.

NB. ***Please see our website for full installation instructions. ***
